(*a*) Number of deaths per 1,000 of mean population. *The standardized death rate* for 1953 was 6·38. This is computed by the application of the Western Australian death rates, for age groups according to sexes, to a population of standard age and sex distribution. (*b*) Number of deaths under one year per 1,000 live births. (*c*) Not available.

No. 17.—Causes of Death, 1953.

Statistics of causes of death in Australia from 1950 are based on the Detailed List of the 1948 Revision of the International Lists of Diseases and Causes of Death. Certain categories have been grouped to facilitate publication, but in all cases the detail required for the Intermediate List of 150 Causes has been preserved, in accordance with World Health Organization Regulations. In general three-digit categories are used, but some four-digit sub-categories have been included to meet Australian requirements.

‡ Combined under heading of "State Abattoirs" as from 1945–46.

(*a*) Figures prior to 1953–54 exclude expenditure from Hospital Trust Fund. (*b*) Including Aboriginal Cattle Stations. (*c*) Administered by State Electricity Commission as from 1946–47. (*d*) Included under "Supply and Shipping." (*e*) "Unemployment Relief" only as from and including 1946–47. (*f*) Included under "Public Works and Buildings." (*g*) Includes "Hospital Fund Allocation" previously included under "Miscellaneous Services." (*h*) Excludes "Hospital Fund Allocation" (*see* Note (*g*)) and allocations to North-West Department. (*i*) Represents expenditure on functions and services in the North-West irrespective of the administrating Department. (*j*) Included elsewhere.

No. 9.—Consolidated Revenue—Expenditure and Receipts CLASSIFIED ACCORDING TO FUNCTION, 1952-53 and 1953-54.

The general purport of this table is to show the net cost, including the relevant portion of Public Debt service, of each *function* of Government, irrespective of the department or departments administering such functions. It should be noted that *Expenditure on Hospitals* is met mainly from the Hospital Trust Fund, into which are paid annual amounts which are allocated to the fund under States Grants (Tax Reimbursement) Acts. Receipts shown for the Item *Roads and Bridges* comprise interest and sinking fund paid by the Main Roads Dept., on loan capital advanced by the Treasurer in respect to certain Metropolitan roads. *Rural and Industries Bank* expenditure from Consolidated Revenue is confined to meeting Public Debt charges. The receipts shown represent the Bank's contribution towards interest and sinking fund on loan capital advanced by the Treasurer. Receipts shown for the item *Navigation, Harbour and Lights* represent, largely, contributions by the Fremantle Harbour Trust on account of interest and sinking fund on loan capital, together with surplus Profits. Expenditure from consolidated revenue in respect to the *Metropolitan Market Trust*, the *State Housing Commission* and certain *Business Undertakings* such as the *State Electricity Commission* and *Charcoal Iron and Steel Industry* covers only Public Debt Charges, and receipts shown represent amounts paid to revenue on account of such charges, current or accrued.

TRADE OF WESTERN AUSTRALIA.

Year ended 30th June, 1954.

In the following summary all values are expressed in Australian currency and figures in parenthesis relate to the previous year.

1.—SUMMARY.

During 1953–54 the State's external trade resulted in an unfavourable nominal balance of £33·6 million compared with a favourable balance of £14·7 million for theprevious year.

With the easing of import restrictions, oversea imports amounted to £42·5 million, compared with £29·9 million during the previous year. Exports to other countries declined from £87·9 million in 1952–53 to £71·6 million in 1953–54, smaller shipments of wheat, flour and gold being mainly responsible.

Trade with other States of the Commonwealth showed an *adverse* balance of £62·7 million, the largest yet recorded, compared with £44 million in 1951–52 and £43·3 million for 1952–53.

Details of the trade balances for the last two years are as follow :—

	1952–53.	1953–54.

2.—IMPORTS.

The total value of imports during the year was £125,212,340, an increase of £26,731,809 on the total for 1952–53 and £2,870,920 on the previous record total of £122,341,420 for 1951–52.

The easing of restrictions on oversea imports is reflected in the rise of 76·2 per cent. in the value of purchases from the United Kingdom—the largest supplier of goods—from £12,951,212 in 1952–53 to £22,819,913 in 1953–54. Of the other British Commonwealth countries, imports from Singapore amounted to £2,207,479 (£2,163,373) ; Republic of India, £1,636,421 (£1,345,529); Ceylon, £1,082,207 (£751,279) ; Christmas Island (Indian Ocean), £834,444 (£874,432) ; Canada, £796,764 (£866,919) ; British Borneo, £246,345 (£96,404), and South Africa, £221,597 (£307,890).

Goods from Foreign Countries totalled £12,302,529 (£9,977,324). Purchases from the United States of America were £4,368,979 (£2,962,812) ; Republic of Indonesia, £1,738,354 (£2,504,893) ; Bahrein Islands, £980,063 (£980,889); Italy, £942,515 (£231,462); Germany (Federal Republic of), £659,472 (£343,970) ; Belgium, £497,544 (£568,377) ; Netherlands, £461,769 (£409,173) ; Sweden, £404,288 (£335,337) ; France, £224,715 (£214,732) ; and Japan, £216,160 (£164,102).

Imports from other States of the Commonwealth totalled £82,687,077 (£68,606,336). The States supplying these goods were Victoria, £36,893,679 (£31,719,816) ; New South Wales, £31,027,709 (£24,585,381) ; South Australia, £10,452,786 (£8,550,076); Queensland, £2,772,699 (£2,420,069) ; Tasmania, £1,195,726 (£944,828) ; and Northern Territory, £344,478 (£386,166).

The main items purchased from all sources comprised Motor Vehicles and Parts, £11,738,789 (£9,004,974); Machinery, £25,300,290 (£18,847,562) ; Apparel, £10,382,319 (£7,890,218) ; Textiles, £6,981,934 (£3,931,960) ; Iron and Steel, £6,389,108 (£5,236,039) ; Petroleum and Shale Spirit, £3,865,621 (£3,155,125) ; Tyres and Tubes, £2,907,109 (£2,730,777) ; Residual Oil, £2,867,081 (£2,948,069) ; and Tobacco and Cigarettes, £2,864,312 (£2,342,971).

3.—EXPORTS.

The total value of exports, including ships' stores, was £91,652,608 compared with £113,132,804 for the previous year. The decrease of £21,480,196 was largely due to the difficulty experienced in the disposal of wheat and flour, the smaller shipments of which accounted for a decrease of £16,230,988, and to interstate exports of gold bullion, which declined from £12,397,423 in 1952–53 to £6,614,707 in 1953–54.

Exports to the United Kingdom totalled £28,000,324 (£36,772,081), a decrease of £8,771,757, while shipments to most other British Commonwealth Countries were similarly less, exports to Singapore amounting to £3,615,485 (£4,386,505) ; Federation of Malaya, £1,830,994 (£1,761,224) ; Republic of India, £1,325,452 (£4,062,590) ; South Africa, £458,730 (£514,203) ; Canada, £347,150 (£373,098) ; and Ceylon, £305,936 (£1,612,396).

The principal buyers in the Foreign Countries group were the United States of America, £5,724,108 (£4,905,724) ; France, £5,700,082 (£5,645,239) ; Belgium, £3,147,720 (£3,719,003) ; Italy, £2,963,112 (£3,522,266); Germany (Federal Republic of), £2,829,868 (£3,146,861); Republic of Indonesia, £2,425,438 (£1,430,814) ; Soviet Russia, £1,892,560 (£195,265) ; and Japan, £1,536,653 (£1,774,162).

The value of Interstate exports was £20,003,918 (£25,281,263), the decrease being mainly due to smaller consignments of gold bullion to New South Wales. Exports to New South Wales were valued at £9,923,222 (£15,718,552) ; Victoria, £4,333,361 (£3,804,532) ; South Australia, £3,520,626 (£3,925,032) ; Queensland, £553,230 (£577,645) ; Northern Territory, £968,398 (£753,586) ; and Tasmania, £296,130 (£50,062).

The following are notes on the principal exports :—

Greasy Wool.

Although slightly less quantities of wool were shipped, prices were better than the previous year. Exports totalled 100,701,099 lbs. (100,908,701 lb.) for a value of £35,672,828 (£33,879,266). The average F.O.B. value was 85·02 pence per lb. compared with 80·58 pence for the previous year.

As usual the United Kingdom purchased the largest share of the clip—45,702,390 lb. valued at £16,160,286 (50,967,956 lb. for £17,302,382). Other purchasers were ; the United States of America, £3,032,792 (£3,099,056) ; Italy, £2,313,697 (£2,035,116) ; Belgium, £2,298,181 (£1,874,911) ; Soviet Russia, £1,892,560 (£195,258) ; Germany (Federal Republic of), £1,352,157 (£1,121,894) ; and Japan, £1,096,742 (£1,242,364).

Scoured Wool.

Exports of scoured wool totalled 11,918,274 lb. (12,603,629 lb.) valued at £5,457,140 (£5,681,628). Shipments to the United Kingdom accounted for £2,360,643 (£3,003,560) ; France, £441,341 (£283,140) ; Italy, £415,810 (£365,097) ; Germany (Federal Republic of), £385,189 (£364,932) ; Belgium, £314,829 (£312,658); the United States of America, £235,587 (£126,817); Canada, £169,412 (£224,178) ; and Turkey, £168,834 (£79,124).

The average F.O.B. value was 109·89 pence (108·19 pence) per lb.

Wheat.

Oversea shipments of wheat declined sharply during the year under review, exports of only 6,800,140 bushels (23,318,935 bushels) valued at £5,635,764 (£20,173,406) being recorded. The average F.O.B. value was 16s. 7d. (17s. 3½d.) per bushel.

United Kingdom purchases totalled 4,783,557 bushels (11,293,520 bushels) valued at £3,962,434 (£9,394,825). Other principal buyers were India, £1,151,788 (£3,733,198) ; Germany (Federal Republic of), £306,572 (£1,136,455) ; and Japan, £96,621 (nil).

Wheaten Flour.

A decrease in the export of wheaten flour was also recorded. Exports totalled 2,956,983 centals (3,524,821 centals) for a value of £5,851,806 (£7,545,152).

The countries of South-Eastern Asia were the main importing countries. Exports to the Republic of Indonesia amounted to £2,375,561 (£1,372,663) ; Singapore, £1,237,722 (£1,545,789) ; Federation of Malaya, £970,079 (£1,182,310) ; and Burma, £325,771 (£59,240).

Purchases by the United Kingdom were £360,039 (£598,927).

Timber.

Timber exports totalled 46,318,277 super feet (47,585,440 super feet) valued at £2,240,042 (£2,073,593).

Exports to the Eastern States, 30,625,469 super feet (36,042,793 super feet), were less by 5,417,324 super feet, but shipments oversea, principally railway sleepers to Ceylon and Iraq, compensated to a large extent.

The main oversea purchasers were United Kingdom, £335,490 (£511,717) ; Iraq, £189,138 (£13,461) ; Ceylon, £148,129 (nil) ; and South Africa, £145,762 (£144,311).

Apples.

Export of apples decreased considerably, 845,754 bushels (1,375,092 bushels) being dispatched for a value of £1,309,390 (£1,930,269). The principal buyers were Sweden, £406,531 (£306,241) ; Singapore, £388,312 (£462,252) ; and the United Kingdom, £343,861 (£1,074,313).

Whale Oil.

Whale Oil Exports increased by 623,601 gallons. 3,182,298 gallons (2,558,697 gallons) valued at £1,093,332 (£936,473) were shipped during the year. The principal buyers were Netherlands, 1,057,085 gallons for £391,986 ; Germany (Federal Republic of), 964,904 gallons for £307,455 ; and Sweden, 692,920 gallons for £307,455.

Fish.

Fish exports totalled 5,271,285 lb. (5,292,603 lb.) for a value of £1,398,698 (£1,304,159).

The trade in crayfish tails to the United States of America was worth £870,395, while other Australian States purchased 1,765,482 lb. of canned fish valued at £197,283.

Meat.

Shipments of beef totalled £873,785 (£697,591) ; mutton and lamb, £437,440 (£731,536) ; and other meats preserved by cold process, £415,460 (£502,915).

Hides and Skins.

Cattle hides and sheep skins valued at £1,580,530 (£1,924,646) were exported, United Kingdom purchases amounting to £212,541 (£330,490).

Eggs.

Exports of eggs in the shell were £525,802 (£550,983) and of eggs not in the shell, £564,698 (£470,220).

Gold Bullion.

Gold bullion sold on oversea premium markets amounting to 418,057 fine ounces was sent to New South Wales. This was valued at £6,614,707 (£12,397,423), which represents an average price per fine oz. of £15 16s. 5d.—3s. 11d. in excess of the present fixed price, which rose on the 1st May, 1954 from £15 9s. 10d. to £15 12s. 6d.

PART IV.—TRADE, TRANSPORT AND COMMUNICATION.

I.—TRADE AND CUSTOMS.

Prior to the 15th November, 1947, Oversea Imports were valued in British currency and represented the F.O.B. value at Port of Shipment plus the statutory 10 per cent. imposed for value for duty purposes, in accordance with the Customs Act. From the 15th November, 1947, following an amendment to the Act, Oversea Imports have been valued in Australian currency F.O.B. Port of Shipment. In this Register all Oversea Imports are valued on the revised basis (values for the periods prior to 15th November, 1947, being re-computed) and, as Interstate Imports and all Exports have always been recorded in Australian currency, the values throughout are now expressed in uniform terms.

No. 1.—Value of Imports into and Exports from the State of Western Australia during the Year ended 30th June, 1954, showing Origin of Imports and Destination of Exports.

No. 5.—IMPORTS into the State, during the Year ended 30th June, 1954.

Note A.—Prior to the 15th November, 1947, Oversea Imports were valued in British currency, and represented the F.O.B. value at port of shipment plus the statutory 10 per cent. imposed for value for duty purposes, in accordance with the Customs Act. From the 15th November, 1947, following an amendment to the Act, the 10 per cent. addition has been eliminated and Oversea Imports have been valued in Australian currency F.O.B. port of shipment. On all Interstate Imports 10 per cent, has been added to the F.O.B. value at the port of shipment.

Note B.—The "quantity" columns are left blank in all cases where the quantities declared are packages of an irregular or unrecognized size, and consequently do not indicate the number, capacity, or weight of articles imported.

Note C.—The following abbreviation is issued throughout this table:—
N.E.I. means "Not elsewhere included."

Note D.—The following record of Imports has been compiled according to a Statistical Classification divided into 21 Classes, which came into operation on the 1st July, 1945. A list of the classes which comprise the Statistical Classification and an extensive Alphabetical Index of Imports and Exports are given on pages xxvii to l.

† The tabulation of separate details for Oversea origin goods imported via Eastern States was discontinued on the 1st July, 1953.

No. 6.—EXPORTS from the State during the Year ended 30th June, 1954.

Note A.—The value of goods exported is recorded in Australian currency. The basis of valuation is F.O.B., or its equivalent, at port of shipment.

Note B.—The "Quantity" columns are left blank in all cases where the quantities declared are packages of an irregular or unrecognised size and consequently do not indicate the number, capacity or weight of articles exported.

Note C.—The following abbreviation is used throughout this table:—
N.E.I. means "Not elsewhere included."

Note D.—The following record of Exports has been compiled according to a Statistical Classification divided into 21 classes which came into operation on 1st July, 1945. A list of the classes which comprise the Statistical Classification and an extensive Alphabetical Index of Imports and Exports are given on pages XXVII. to L.

Maps showing Statistical Districts and Divisions	Facing page 4

Special Notes—

1. The boundaries of Road Board Districts have been adopted as Statistical Districts since 1928–29 in lieu of the districts as defined in previous years from the Sheet Lines of the Standard Plans of the Lands Department.
2. It should be noted that from time to time, changes in boundaries of various Road Districts will not always allow for true yearly comparisons between Statistical Districts affected by such changes.
3. Statistics published in this " Part " are grouped in the new Statistical Divisions which became operative from 1st January, 1954. These coincide with the Regional Divisions of the State recognised for Governmental purposes. A map showing the revised Statistical Divisions is published facing page 4.
4. For Special Tabulations showing certain aspects of Mixed Farming see Part V of the Statistical Register for 1947–48.

VI.—VALUE OF PRODUCTION.

NET VALUE—

The Annual Net Value of Production represents the sum available each year for distribution among those concerned in industry, i.e., workers, proprietors (including landlords), and providers of capital.

In combining industries this is the value that is used in order to avoid the inevitable duplication that would result if "Gross" or "Local" values were aggregated.

I. PRIMARY PRODUCTION.

(*a*) *Gross Value* is the value placed on recorded production at the wholesale price realised "at the principal market." In cases where primary products are consumed at the place of production or where they become raw material for a secondary industry, these points of consumption are taken as the "principal market."

(*b*) *Marketing Costs*, which are deducted from "Gross Value" to obtain "Local Value," comprise Freight, Cost of Containers, Commission, and other handling charges.

(*c*) *Local Value* is the value recorded at the place of production, and is obtained by deducting "Marketing Costs" from "Gross Value."

(*d*) *The Value of Goods Consumed in the Process of Production* covers seed and fertilizers used, pickling, sprays, dips, fodder consumed, fuel and oil, repairs, and similar costs, and is deducted from "Local Value" to obtain "Net Value."

(*e*) *Net Value* represents the return to the producer (farmer, pastoralist, mine owner, etc.) after deducting from "Local Value" the "Value of goods consumed in the process of production." Such return is the sum available for payment of wages, interest, rent, and producer's own income.

II. MANUFACTURING.

The initial value taken is that of Output "at factory door." The *Net Value of Manufacturing*, comparable with the net value of primary production, is the value added during the course of manufacture or treatment and is computed by deducting from output value the value of "goods consumed in process of production," viz.: materials used; power, fuel and light; repairs, lubricating oil and water; containers, packing, etc. In other words, it represents the sum available to the manufacturer for providing for wages, rent, interest, depreciation, certain other costs (such as advertising and insurance), and for his own income.

III. GENERAL.

(*a*) To secure a proper appreciation of the value of production as set out in the following tables it is well to keep in mind the following considerations:—The sum of the gross values of the several agents of production contains substantial duplications. The total value realised for a season's wheat, for instance, includes costs of transport, commission, and other handling charges, which items form the incomes of those performing these services. Similarly, the Local Value includes value of fertiliser, etc., used, which item will have been included in the value of manufactured production. Again, fodder grown and valued as an agricultural product would also, if fed to milch cows, be duplicated in the value of dairy production. When, however, *net* values are being ascertained, the value of such fodder consumed is deducted as a cost against dairying, thus eliminating duplication. Thus, while Gross Value represents a very accurate estimate of the value of the production of any particular industry, *only Net Values should be aggregated in arriving at a total value of "All Recorded Production."* The ratio of Marketing Costs to Gross Value of Production varies greatly as between industries. Thus, the great bulk of forestry production sustains no marketing costs, as the logs form raw material for a secondary industry (saw-milling) without being "marketed." For this reason all forest products were valued prior to the year 1933–34 at place of production before any marketing costs were incurred. Commencing with 1933–34, however, marketing costs, together with cost of goods consumed in process of production, have been taken into account where actually incurred. In any case, the statement of net values is not affected and is comparable throughout.

(*b*) As a proportion of *all* production, *recorded* production varies somewhat from year to year. On the average, total net recorded uprodction represents slightly more than half of the net value of all goods and services produced in Western Australia.

Factory Statistics

PERTH :

BY AUTHORITY: WILLIAM H. WYATT, GOVERN PRINTER

89369/9/55 1956.

Part VI.—FACTORY STATISTICS.

DEFINITION.—For Statistical purposes, a factory is an establishment which is engaged in the processes of manufacturing, assembling, treating or repairing and in which four or more hands are employed or motive power is used.

SPECIAL NOTES—

(1) *Employment figures relate to the factory proper and exclude persons engaged in obtaining raw materials (e.g., persons employed by sawmills in felling and hauling logs) or persons engaged in selling or distribution (e.g., persons employed by Electricity Generating Stations or Gas Works on transmission and distribution).*

(2) *Unless otherwise stated, figures for "Employment" include particulars of "Working Proprietors," and relate to the period of operation, which is not in all cases for the full twelve months. Contrawise particulars for "Salaries and Wages" exclude the value of "Working Proprietors'" services.*

(3) *The Net Value of Manufacturing, shown herein as "Value of Production" or "Net Production," is the value added in the course of manufacture. It is derived from Output by deducting the value of goods consumed (viz., materials used; fuel, power, and light; lubricating oil; repairs to plant; containers, packings, etc.) and represents the sum available for payment of wages, rent, interest, depreciation, other overhead costs and for the manufacturer's own income.*

(4) *The Statistical Divisions referred to in this publication conform with the revised Statistical Divisions which became operative from 1st January, 1954, and coincide with the Regional Divisions of the State recognised for Governmental purposes. A map showing the revised Statistical Divisions appears in Part V. of the Statistical Register.*

PART XII.—RETAIL PRICES, WAGES, EMPLOYMENT, AND MISCELLANEOUS.

I.—RETAIL PRICES

This section gives details of Retail Prices, Consumption of Foodstuffs, etc., and Retail Price Index Numbers.

RETAIL PRICES.

Retail Prices of selected groups of commodities and services are collected regularly by the Government Statistician from representative informants in the more important towns of Western Australia.

From 6 towns, prices are obtained for regimens covering (*a*) 41 items of Food and Groceries, (*b*) Rents of 4 and 5-roomed Houses, (*c*) 80 items of Adult and Juvenile Clothing, and (*d*) 27 items of Household Drapery and Utensils, and in addition, other items of Miscellaneous Expenditure, such as Fuel and Light. Prices of Food and Groceries only are collected from a more extensive list of towns. Informants are required to furnish prices monthly (prices as at the middle of the month) for Food and Groceries and quarterly (particulars as at the 15th of the middle month of each quarter) for House Rents, Clothing, and Miscellaneous items.

Specific grades and qualities have been established for the various items included in the regimen in order to ensure that all informants throughout the State shall quote consistently for articles of the same standard. The collection of data in the Metropolitan Area, Kalgoorlie-Boulder, Northam, Bunbury, and Geraldton—the "five towns" of Western Australia in the several Commonwealth retail price index series—is made under the authority of the Commonwealth Census and Statistics Act, 1905–1949. The State Statistical Department directly supervises the collection of data for the Commonwealth Statistician. The actual collection of returns is carried out by specially qualified field officers of the Commonwealth Bureau of Census and Statistics, who are attached to the State Department. These officers check prices and standards in the shops of informants, and inspect houses listed on the rent returns.

In those towns where returns are required under the State Statistics Act, 1907, the method of collection is substantially the same as that outlined above.

During the war years 1939–45 unusual difficulty was experienced in obtaining prices for the compilation of several of the abovementioned series, due mainly to the scarcity and sporadic supply of certain types of goods and to changes in the grade and quality of such. Difficulties were most pronounced in the case of the clothing section and the household drapery and utensils section of the miscellaneous series, necessitating in some cases the substitution of new grades, qualities or types of articles for those formerly included in the regimen, or again the adoption of various statistical devices to overcome the effects of the absence of quotations for goods temporarily off the market or in short supply.

In some measure the problem remained under early post-war conditions, as some goods were still in short supply and stocks were extremely variable. It should be noted, however, that all practicable steps are taken to preserve the statistical integrity of the index.

Food and Groceries.

The regimen of Food and Groceries commodities adopted for the several index series issued by the Australian Statisticians is set out in Table No. 1. This shows the average prices quoted by retailers in the Metropolitan Area during each month of 1954.

CONSUMPTION OF FOODSTUFFS, ETC.

No. 2.—Estimated Annual Consumption of Foodstuffs, Beverages and Tobacco.

Details of the estimated annual consumption of some of the more important food commodities consumed in Western Australia are shown in this table. Particulars of the consumption of spirituous and alcoholic liquors and tobacco preparations are also given.

The figures have been derived from records of production, imports and exports, for the years 1949–50 to 1953–54, and show the average amounts consumed annually per head of population during that period. They include quantities used in manufacturing, such as flour in biscuits, bread, etc.; sugar in jam, and so on.

Where the necessary data were available, adjustment has been made for movement in stocks, and for exports as ships' stores.

RETAIL PRICE INDEX NUMBERS.

In this section are shown Index numbers computed from retail prices returns furnished by informants in the more important towns of the State.

These Index numbers cover selected "regimens" (or lists of commodities or services) comprising items of—

I.—Food and Groceries,

II.—Housing (Rents of 4 and 5-roomed Houses),

III.—Clothing, and

IV.—Miscellaneous Household Expenditure,

all of which are combined in the regimen used for the "C" Series Index.

The Price Index series simply measure variations in the aggregate cost of a given regimen of commodities at various intervals of time or as between different towns, and are intended for use as approximate measures of general retail price movements in the commodity classes to which they refer. In this connection it cannot be too strongly emphasised that they do not, and are not, intended to measure an absolute "cost of living," *vide* Commonwealth Statistician's Labour Report No. 21, Appendix "Wages and Prices," page 167.

In the series set out in the following pages the Index numbers themselves represent the several "aggregates" expressed as relatives of the weighted average "aggregate cost" of the same regimen in the six capital cities over some specific interval of time, *e.g.*, the five years 1923 to 1927.

To ensure that the series shall be as reliable as possible, the commodities comprising the complete regimen have been selected to conform to the following conditions:—

1. They must be such that they can be clearly and definitely described.
2. They must be capable of standardisation, and mean the same thing at different times and places.
3. They must not be subject to violent or extreme seasonal fluctuations (hence, in general, fresh fruit and vegetables are excluded from the regimen).
4. They must be in common use, and their usage must comprise an appreciable proportion of the total consumption of the commodity group to which they relate, and moreover, remain relatively constant.
5. On the whole, they must be a fair sample of the commodity group which they purport to represent.

RETAIL PRICE INDEX NUMBERS—*continued.*

No. 3.—Food and Groceries—Five Principal Towns.

This table sets out Index numbers representing variations in the prices of Food and Groceries in each of the five Western Australian towns covered by the Commonwealth Statistician's inquiries. The table also gives weighted averages for the "five towns," and the six capital cities of the Commonwealth. Weighting is on a population basis.

RETAIL PRICE INDEX NUMBERS—*continued.*

No. 7.—Clothing—Five Principal Towns.

Variations in the prices of the clothing regimen are given in the table hereunder. The regimen is based on the requirements of a nominal family unit of five persons, comprising a man, woman, boy (aged 10½ years), girl (aged 7 years), and boy (aged 3½ years). These persons are taken as representative respectively of men over seventeen years, women over seventeen years, children ten to sixteen years, children five to nine years, and children under five years.

Within each section, the items are weighted according to their relative consumption by the type of person concerned, and the sectional aggregates themselves are brought together in one composite aggregate after they have been weighted in accordance with an appropriate population factor. This factor represents the proportion which each age group bears to the total population.

No. 9.—Food and Groceries, Housing, Clothing and Miscellaneous ("C" Series)—Five Principal Towns.

This table combines together in one series, the index numbers of Food and Groceries, Housing, Clothing and Miscellaneous Expenditure appearing in the preceding pages. This is the Commonwealth Statistician's "C" Series index of Retail Prices. The "C" Series index numbers were adopted by the Commonwealth Court of Arbitration as the basis for the adjustment of the wages declared in its judgment of the 17th April, 1934. From the 1937 Basic Wage judgment, until the 12th September, 1953, the Commonwealth tribunal used special "Court Series" based on the "C" Series.

Five Principal Towns, Six Capital Cities and Collie—Each Series.

Tables Nos. 11 to 15 compare movements among the several Index series in each of the Commonwealth Statistician's "five Western Australian towns," while Tables Nos. 16, 17 and 18 give similar details in respect of the weighted average of these towns, the six capital cities and Collie.

Note.—Each series has been given its own base. This is the weighted average cost of the particular regimen concerned, for the six capital cities, during the period 1923–27. The Index numbers cannot, of course, be compared with each other horizontally in order to show the relative costs of the different regimens, since the base of each series has been made equal to 1000.

II.—WAGES.

No. 19.—State Basic Wage.

Under the provisions of the Industrial Arbitration Act, 1912–50, authority is vested in the State Court of Arbitration to declare an annual Basic Wage, which, until 1950, was operative from the 1st of July each year.

The first decision of the Court took effect on the 1st July, 1926, and prescribed a rate of £4 5s. 0d. for males and £2 5s. 11d. for females throughout the whole of the State. In fixing the male rate, the Court divided the wage into four elements, viz., Food and Groceries, Rent, Clothing and Miscellaneous Expenditure, and allowed amounts for each of these elements to meet the requirements of a family unit of four, comprising a man, his wife and two children. For Food and Groceries the amount was equivalent to the Piddington Commission's standard for this section (reduced to provide for a family unit of four) ; for Rent, the average rental of four and five-roomed houses ; for Clothing, an amount approximating the sum fixed for such expenditure by the New South Wales Board of Trade in 1925, and for Miscellaneous an amount based on the Piddington Commission's finding.

These rates remained unaltered until the 1st July, 1929, when the amounts were increased to £4 7s. 0d. and £2 7s. 0d. respectively, with the exception of certain specified goldfields areas, in respect of which the previous wage was retained.

A revision by the Court following the 1930 inquiry resulted in the declaration of a separate wage of £4 6s. 0d. for males and £2 6s. 5d. for females, in respect of the Metropolitan Area, and rates of £4 5s. 0d. and £2 5s. 11d. respectively for all other parts of the State.

Additional power was given the Court under the provisions of the Industrial Arbitration Act Amendment Act, 1930, to enable quarterly adjustments to be made to the annual declaration, and on the 3rd March, 1931, rates of £3 18s. 0d. for males and £2 2s. 2d. for females were prescribed for the Metropolitan Area, while all other parts of the State were fixed at £3 17s. 0d. and £2 1s. 8d. respectively.

The annual declaration operative as from the 1st July, 1931, did not vary these amounts, but a further quarterly adjustment on the 18th August, 1931, marked the inauguration of a different wage for agricultural areas, which are taken to be those areas comprised within the official South-West Land Division as gazetted under the Land Act.

Wage levels in all divisions of the State were considerably increased as from the 1st July, 1938, following the most comprehensive inquiry since the original declaration. In the course of the 1938 inquiry, special consideration was given to the factors of National Income and Standard of Nutrition. In the case of the Rent and Miscellaneous elements of the wage the "old" standards remained unchanged. For Clothing, however, the Court adopted the Piddington "standard"—reduced to provide for a family unit of four—and for Food and Groceries, the Piddington standard plus an amount of 1s.

At a sitting of the Court held on 26th February, 1942, to consider the quarterly adjustment of the basic wage, the Court decided that, in the light of existing economic conditions, there should be no alteration to the rates then in force. This decision marked the first occasion upon which the Court, in the exercise of the discretionary powers conferred upon it under the Act, had refrained from making a quarterly adjustment to the wage to equate its purchasing power to the "standards" of the relevant annual declaration. It was followed by a similar decision given on 29th April, 1942, when the Court reaffirmed that no adjustment would be made to existing rates, despite further increases in retail prices.

On 11th June, 1942, the Court in its annual declaration adopted the rates which had operated since 28th July, 1941, as its new base, and these remained in force until 8th August, 1942, when they were superseded by a Basic Wage Adjustment Order made by the Premier on 7th August under the authority of National Security (Economic Organisation) Regulations. The rates established under this Order were substantially the current equivalents of the standards adopted by the Court in its annual declarations, 1938-1941.

These standards were re-adopted by the Court for the purposes of the quarterly adjustments made on the 30th October, 1942, and subsequently until the Court's Interim Basic Wage Declaration of the 26th February, 1947. In this declaration which was made under powers conferred by an amendment (December, 1946) to National Security (Economic Organisation) Regulations the basic wage was increased by a loading of 5s. This loading was varied proportionately to the remainder of the basic wage in subsequent declarations and quarterly adjustments.

The Industrial Arbitration Act Amendment Act of 1950 provided, *inter alia*, (1) that basic wage determinations may be made at any time during the year at intervals of not less than twelve months subject only to quarterly adjustments and (2) that in such determination the Court must give due consideration to the economic capacity of industry. Pursuant to this enactment and subsequent to the judgment of the Commonwealth Court, the State Court increased the basic wage in all Divisions by £1 for males and 15s. for females as from the 18th December, 1950. It also decided in February, 1951, that subsequent quarterly adjustments should be based on variations in the "C" Series Retail Prices Index Numbers. On the 28th November, 1951, the Court declared the Basic Wage for females at 65 per cent. of the male rate, to operate as from the 1st December, 1951.

On the 13th November, 1953, and for each quarter thereafter up to, and including, the decision of the 27th April, 1955, the Court again exercised its discretionary powers, conferred by Section 127 of the Act, and determined that no change should be made in the Basic Wage although there were appreciable movements in the "C" Series Retail Prices Index.

The following table shows annual declarations and certain interim variations since the original decision of 1926, which remained unaltered until 1st July, 1929.

No. 20.—Commonwealth Basic Wage.

By an amendment of 1949 to the Commonwealth Conciliation and Arbitration Act, the basic wage for an adult male worker is defined in Section 25 as " that wage, or that part of a wage, which is just and reasonable for an adult male, without regard to any circumstance pertaining to the work upon which, or the industry in which, he is employed." The section contains a similar definition of a basic wage for females. Before the inclusion of this amendment, the Act empowered the Court to prescribe a " minimum rate of wage " but it neither defined, nor provided for the determination of, a specific " basic wage." In general terms, however, the basic wage was understood to be identifiable as the minimum wage (including " loadings ") payable to an adult unskilled labourer. (A " loading " may be defined as an addition to the " basic " wage as compensation for some peculiar condition of labour or environment or other circumstance, and not by way of " margin for skill.")

The history of the Commonwealth basic wage is summarized below :—

(1) Until 1934, rates were based on the " Harvester " judgment delivered by Mr. Justice Higgins in 1907, which fixed 42s. per week for Melbourne as a reasonable amount to meet the needs of " a family of about five."

From 1913 up to the end of 1921, the basic wage was simply a " Harvester " equivalent, rates being fixed by varying the original Harvester wage in accordance with movements in the purchasing power of money as disclosed by the Commonwealth Statistician's " A " Series index numbers covering items of food and groceries and rents of " all houses." Up to 1918 the Court, in computing " Harvester " equivalents, used the index numbers for the previous calendar year. From 1918 to the end of 1921 the figures for the next preceding four quarters were used, and from 1921 onwards the index numbers for the latest quarter available. In that year the Court began to insert provisions in awards for the automatic adjustment of wages according to quarterly movements in the " A " Series index, and a loading—subsequently known as the "Powers 3s."—was added to the " Harvester " equivalent by Mr. Justice Powers to ensure that over a period of rapidly rising prices the worker would suffer no loss of real wages in the interval between the adjustment of rates.

The method of fixation and adjustment remained unaltered until after the onset of the depression. Then in 1931 the Court, having satisfied itself that unfavourable economic conditions prevented the maintenance of real wages at their existing level, directed that, with certain exceptions, all wages under its jurisdiction should be reduced by 10 per cent. as from the 1st February of that year.

In its judgment of May, 1933, the Court concluded that the method of adjusting wages to conform to variations in the "A" Series index numbers had resulted in a decrease of real wages beyond the prescribed percentage. To correct this movement it adopted the use of the " D " Series index.

(2) In a judgment delivered in April, 1934, the Court introduced an entirely new basis for the fixation of the basic wage. The " Harvester " standard supplemented by the Powers loading was discarded and a fresh starting point selected. The new wage was largely founded upon a declaration of 84s. per week made by the New South Wales Board of Trade in August, 1925. As this amount took into consideration the upward tendency of prices, the Court regarded the rate as applicable to the year 1926. The " C " Series index number for Sydney for that year was 1033, and for the December quarter of 1933 stood at 829. Thus an amount of 84s. in 1926 had the same purchasing power as 67s. in 1933, which became the rate applicable in Sydney from the 1st May, 1934. The equation of this wage to the index number 829 established the relationship, 1000 in the " C " Series index = 81s. in the wage and, by applying the factor 0·081 to the " C " Series index number for any town or group of towns at any time, the wage in shillings could be readily computed. Owing to adverse industrial conditions in South Australia and Tasmania, the new rates for Hobart and Adelaide were graduated so as not to come into full operation until the 1st June, 1935. The date on which future periodical adjustments were to become operative was altered to the first pay period in the months of June, September, December and March. Adjustments were continued on this basis until 1940, since when they have taken effect from the beginning of the second month after the end of each quarter.

(3) The hearing of a claim by the combined unions for an increase in the basic wage was concluded in June, 1937. The Court, in fixing a new rate, transferred the basis of the adjustment of wages from the " C " Series to a special " Court " Series based upon the relationship between wages and index numbers which had been established in 1934. This Court Series was, in effect, nothing more than a table expressing in shillings the wage rates derived by the use of the conversion factor 0·081. The Court's judgment further provided for the addition of " prosperity loadings " to the rates so derived, which came to be designated the " needs portion " of the wage. The amount of the loading applied to the " needs " wage for Sydney, Melbourne and Brisbane was 6s., for Adelaide, Perth and Hobart, 4s. and for the Six Capital Cities as a whole, 5s.

(4) In general, the method of the 1937 judgment was retained by the Court until its " interim " decision of the 13th December, 1946 when, in granting an increase of 7s. per week in the " needs " portion of the wage, it inaugurated a Court Index (Second Series). In fixing the base of this

new series, the "C" Series index number (1146) for the Six Capital Cities as a whole in the September quarter, 1946 was equated to the "needs" portion (100s.) of the new Six Capitals wage. This established the base, 1000 in the "C" Series index = 87s. in the wage. The immediate monetary effect was to increase by 7s. per week the "needs" wage in each of the capital cities with the exception of Hobart, where the increase was 6s. The prosperity loadings were retained at their original levels.

(5) On the application early in 1949 of certain unions seeking, among other things, an increase in the basic wage the Court, after an exhaustive examination of the Australian economy, declared a general increase of 20s. per week. Judgment was delivered on the 12th October, 1950, the new rates to be operative from the first pay period in December. The Court also introduced a Court Index (Third Series) based upon the equation of 1572 (the "C" Series index number for the Six Capital Cities as a whole in the September quarter, 1950) to 162s., the increased weighted average wage for the Six Capitals (made up of the "needs" portion 137s., plus a uniform prosperity loading of 5s., plus the additional 20s. awarded by the Court). In this way, 1000 in the "C" Series index became equal to 103s. in the wage. In determining the new rate of payment, a uniform amount of 25s. was added to the existing "needs" basic wage, with the concurrent discontinuance of the prosperity loading as a separate entity. This had the effect of increasing the basic wage in Sydney, Melbourne and Brisbane by 19s., in Adelaide, Perth and Hobart by 21s., and for the Six Capital Cities as a whole by 20s. From, and including, the first pay period in February, 1951 the rates so determined were to be subject in their entirety to quarterly adjustment in accordance with movements in the Court Index (Third Series). Thus the components "needs portion" and "prosperity loading" ceased to exist as separate and distinguishable parts of the wage.

(6) Following applications by employers' organisations requesting, amongst other things, "that the system of adjusting the basic wages in accordance with variations occurring in retail price index-numbers be abandoned" and counter claims by employees' organisations for increases in the basic wage for adult males, the Court, on the 16th September, 1952, commenced hearing evidence in what has come to be known as the "Basic Wage and Standard Hours Inquiry 1952–53." Submission of evidence continued intermittently until the 11th September, 1953, and on the following day the Court announced its decision. The application for discontinuance of the system of adjusting the basic wages in accordance with variations in the retail price index-numbers was granted; all of the other applications were refused. On the 27th October, in stating the reasons for its decisions, the Court made it clear that, as in its opinion there should be no departure from "its now well established principle that the basic wage should be the highest that the capacity of the community as a whole can sustain" and as it had "withdrawn from relating the basic wage to the fulfilment of any particular standard of needs," the Court "finds it impossible to justify the continuance of an 'automatic' adjustment system whose purpose is to maintain the purchasing power of a particular wage (assessed with regard to the capacity of industry to pay such wage in 1950)." In consequence, the basic wages which became operative on the 1st August, 1953, will stand until there is another general review by the Court.

DWELLINGS SUMMARY, WESTERN AUSTRALIA—CENSUSES OF 1947 AND 1954.

In Tables Nos. 43, 44, 45, 48, 50, 51, and 52 figures are shown separately for "Metropolitan Urban," "Other Urban," and "Rural."

"Metropolitan Urban" comprises the Metropolitan Statistical Division.

"Other Urban" comprises—

(1) all country municipalities; and

(2) towns outside the Metropolitan Statistical Division not separately incorporated for purposes of local government but whose boundaries were specially determined for Census purposes, and which had a population of 1,000 or more at the Census.

"Rural" comprises all that part of the State not included in "Metropolitan" and "Other Urban."

For the purpose of the Census a "*dwelling*" is any habitation occupied by a household group living together as a domestic unit whether comprising the whole or only part of a building.

No. 43.—Occupied Dwellings, according to Class.

(Exclusive of dwellings occupied solely by full-blood Aborigines.)

Grand Total, Dwellings	66,730	58,037		124,767	90,741	27,217	44,865	162,823

(*a*) In previous Censuses dwellings returned on the Schedules as Sheds, Huts, Garages, etc., were included with Private Houses. In the Census of 1954 these dwellings are shown in tabulations as a separate group whenever practicable, but are linked with Private Houses to preserve continuity with past Census results.

(*b*) "Share of Private House" is a portion of a shared Private House which is occupied separately and for which portion a separate Householder's Schedule was furnished.

(*c*) "Flat" is part of a House or other building which can be completely closed off and which includes both cooking and bathing facilities.

(*d*) "Other" Private Dwelling is part of a building which is not a self-contained unit. It may be an apartment, rooms, etc.

(*e*) "Dwellings Other than Private" include Hotels, Boarding Houses, Lodging Houses, Hostels, Hospitals, Educational, Religious and Charitable Institutions, Defence and Penal Establishments, etc.

(a) The index numbers appearing in these four columns cannot be compared horizontally to show the relative levels of the groups since the prices aggregate in each group in the base period is made equal to 1,000.

(b) The "C" Series index figures combine together in one series the index numbers relating to food and groceries, rent, clothing, household drapery and utensils, fuel and light, and other miscellaneous items of household expenditure. They may be used directly to show the relative levels in different places and at different times.
